If Mister Wolf were to come back...*

But... Where is Mister Wolf?

Can I see the end of his tail peeking out behind that bush?
Or the tips of his pointy ears?
No! That's not Mister Wolf!
It's just Giraffe, Panther, Gorilla and Hippo playing. They're
trying to scare us by hiding in the forest. But be careful —
Mister Wolf isn't far away...

Every double page in *Are You There Mister Wolf?* features a large flap to lift up, encouraging children to explore and engage with the book's illustrations while enjoying the suspense of revealing the fun surprise underneath.

**WILL LITTLE GREEN MOUSE GET AWAY?

*A little green mouse
Was running through the grass...*

The Little Green Mouse is a large format, interactive book, that includes five new and entertaining moving sections — the little mouse runs away, is caught by his tail, teeters on the edge of a saucepan and wobbles by the side of a swimming pool, before magically and surreally turning into a snail...

Marie Paruit offers readers a selection of colourful, engaging and fun illustrations while ensuring that the text, pictures and interactive sections flow perfectly together. The result is a book that children will love reading, re-reading, laughing at, acting out — and having fun with.

keen to get the share of the nut that they've been promised. Unfortunately, none of them is able to break the walnut open! The magpie that the other animals had been teasing discovers what the problem is — there's something living inside the nut!

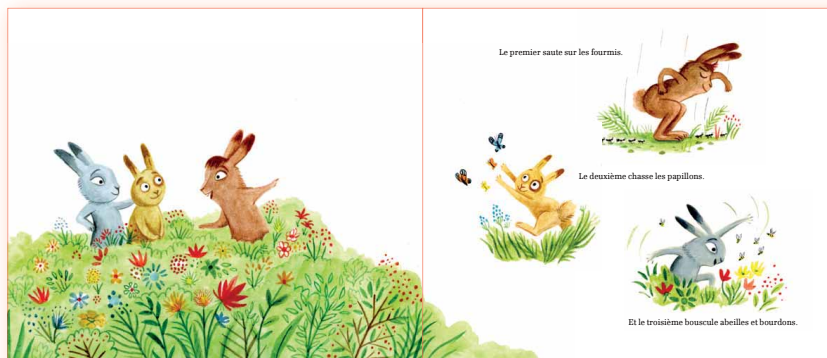

IT'S ALWAYS BETTER TO HAVE EVERYBODY ON YOUR SIDE...

Three rabbits defy their parents' instructions and set off to explore a farm. When the rabbits are caught and trapped in a box, the ants, bees and butterflies that the

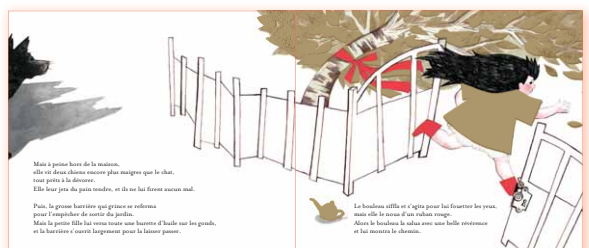

rabbits had done their best to annoy earlier in the day make their way past without stopping. The rabbits are terrified... Eventually their parents heed the warnings of the same insects the rabbits tormented and come to save them — but will the naughty youngsters have learned their lesson?

A KEY TIME IN WORLD HISTORY

In the fifteenth century, European adventurers left their homes to conquer the world. The period marked the start of a series of extraordinary maritime journeys that took, among others, Vasco de Gama to South Africa and, later, India and Spain, Christopher Columbus and Magellan to America. The era may have been a turning point in human history, but it also brought with it colonisation and violence towards native populations. With its distinctive graphic novel format, Great Discoveries offers an accessible introduction to every aspect of this key historical period — from the political context in Europe to stories from the expeditions themselves, via an exploration of the conditions in which sailors worked at sea and under which indigenous people were enslaved.

Through their discussions and trips to important sites and events like the European Parliament, the European Fair in Strasbourg and Natzweiler-Struthof concentration camp, the two friends tackle key questions about Europe, its role, history and activities, the relationship between European countries and their relationship with the rest of the world, globalisation, money, debt, refugees, security and terrorism...

The story of the god who created and cared for humanity — in the face of the fiercest opposition.

To stave off the boredom that begins to overcome the gods of Olympus, the Titan Prometheus suggests to Zeus that he could fill the Earth not just with animals, but also — a critical decision — human beings, a species created for the express purpose of praising the gods and performing sacrifices in their honour. Prometheus teaches his human creations how to hunt, how to sow, and how to write... As well as how to control fire, knowledge that was previously the exclusive preserve of the gods. In response to Zeus's great anger, Prometheus is forced to undergo the cruellest possible punishment.

From the creation of the first humans to a universal flood via Pandora's box and the suffering of Prometheus, find out all about the key events in a story that has served as a source of inspiration for writers and artists over thousands of years.

Nothing happens by chance — especially not in this story.

Léna idolises her older brother Martin. This summer, though, Martin doesn't seem like his usual self — he's quit his dream job and has come back home. On a whim, Léna and Martin head to the south of France to stay with the mysterious Zoé, in the house that her recently deceased uncle owned. The siblings are

looking forward to helping each other get back to the way they used to be, while enjoying a holiday that should prove at least a little bit entertaining...

With her initial excitement waning, however, Léna starts to feel uneasy — why did Zoé want to draw her and Martin into her world? What secrets are lurking in Zoé's uncle's house? And who is the man who has been stalking the forest since Léna and Martin arrived?
